

*As a deeply concerned American, I do not support ANY weakening of regulations that protect our drinking water from contaminants such as lead, PFCs, hexavalent chromium, toxic pesticides or other dangerous chemicals. At a time when too many Americans lack access to safe drinking water, the EPA should be waging war on pollution – not waging war on our clean water protections. I stand with EWG in demanding that the EPA protect Americans from pollutants and defend our access to clean drinking water.*
